

Complete the following tasks:

1. Complete these user stories:

- As a vanilla git power-user that has never seen GiggleGit before, I want to understand the differences between Gigglegit and regular git so I can use version control in GiggleGit without confusion
 - i. Ticket 1. Create a beginner friendly tutorial
 - 1. Develop a tutorial explaining the key differences between Git and GiggleGit, focusing on unique features like meme-based merges and how to manage merges in GiggleGit.
 - ii. Ticket 2. Create a Guide
 - 1. Create a simple guide for new users to get started with GiggleGit, showing them how to make a repository, commit changes, and perform a merge.
- As a team lead onboarding an experienced GiggleGit user, I want to ensure they understand all the advanced features of GiggleGit, so they can effectively use it and explain how to use it to the team
 - i. Ticket 1. Create an advanced guide explaining advanced features
 - 1. Develop a detailed guide explaining advanced features of GiggleGit
 - ii. Ticket 2. Host a demo session
 - 1. Host a demo session for experienced users, showcasing how they can use GiggleGit in actual scenarios, so they can learn advanced features

2. Create a third user story, one task for this user story, and two associated tickets.

- As a new GiggleGit user, I want to be able to migrate my existing projects into GiggleGit, so I can start using the version control system without losing any of my previous work.
- Task: Migrate projects into GiggleGit
 - i. Ticket 1. Develop project import functionality
 - 1. Build a tool or functionality that allows users to reliably import their existing Git repositories into GiggleGit using a simple command. Make sure it preserves history and files
 - ii. Ticket 2 Create migration guide for users
 - 1. Write a guide that walks users through the process of migrating their existing Git projects to GiggleGit. Include step-by-step instructions and troubleshooting tips.

3. This is not a user story. Why not? What is it?

- As a user I want to be able to authenticate on a new machine
- It doesn't explain why the user needs to authenticate on a new machine or what benefit it is to the user. This is more like a wish or a request.
